

Standard Information

Standard Number: CAN/CSA-E60335-2-11:13

Standard Name: Household and similar electrical appliances — Safety — Part 2-11: Particular requirements for tumble dryers

Standard Edition and Issue Date: 3rd Edition Dated December 1, 2013

Date of Previous Revision of Standard: 2nd Edition Issued June 1, 2001 and Reaffirmed 2006

Effective Date of New/Revised Requirements

Effective Date: June 1, 2018

Impact, Overview, Fees and Action Required

Impact Statement: A review of all Listing Reports is necessary to determine which products comply with new/revised requirements and which products will require re-evaluation. **NOTE:** Effective immediately, this revised standard will be exclusively used for evaluation of new products unless the Applicant requests in writing that current requirements be used along with their understanding that their listings will be withdrawn on Effective Date noted above, unless the product is found to comply with new/revised requirements.

Overview of Changes:

Appliances currently Certified to a previous edition of the subject standard (E335-2-11 or E60335-2-11) are required to comply with the requirements of CAN/CSA-E60335-2-11:13 prior to the effective date.

Specific details of new/revised requirements are found in table below.

If the applicable requirements noted in the table are not described in your report(s), these requirements will need to be confirmed as met and added to your report(s) such as markings, instructions, test results, etc. (as required).

The content of this SUN is based on CSA Notice; Appliances No. 35

Client Action Required:

Information – To assist our Engineer with review of your Listing Reports, please submit technical information in response to the new/revised paragraphs noted in the attached or explain why these new/revised requirements do not apply to your product (s).

Current Listings Not Active? – *Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.*

Standards Update Notice (SUN)

Issued: March 22, 2017

Description of New/Revised Technical Requirements

Clause	Verdict	Comment
1		The scope now includes dryers that use a refrigerating system. Note that Canadian deviations to Annex BB prohibit the use of flammable refrigerants.
7.1, 7.12, 7.14, 7.15		A new marking, either "Read the instructions" or a book symbol, is required.
7.1A		Risk of fire markings are added.
7.12, 7.12A, 7.12B, 7.12.1		Additional user and installation instructions are required.
15.2		The spillage test is now applicable to all tumble dryers, not just those with a working surface.
19.4, 19.101		Changes to the test parameters for the abnormal operation test where dry textile material is used and controls that limit the temperature during the test of clause 11 and all self-resetting thermal cut-outs are short-circuited and the abnormal operation test with the drum belt removed.
19.9		The running overload test in the Part 1, which was previously not applicable, is now made applicable to appliances that have overload protective devices incorporating electronic circuits to protect the windings of the drum motor.
19.102		New short circuit tests are added for appliances that permit test probe C of IEC 61032 to gain access to live parts below the drum.
19.103		New test to confirm that there is no risk of fire that could result from textile material coming in contact with a lamp cover.
19.103A, 19.103B		Load fire containment and base fire containment tests are added.
20.102		The door and drum sizes for which the minimum force of 70N to open the door is required have changed, which may affect whether or not this test is done for some products.
20.104		A test to confirm that drum motors do not start without manual intervention is added, but Canadian deviations remove it.
22.104		New requirement that the operation of protective devices for heating circuits are not to the disable cool down period.
22.105		New requirement for a cool down period.
30.101		New requirement for a needle flame test, or V-1 min material for non-metallic materials used in close proximity to heating elements where lint could accumulate.
		CUSTOMERS PLEASE NOTE: This Table and column "Verdict" can be used in determining how your current or future production is or will be in compliance with new/revised requirements.
