

STANDARD INFORMATION

Standard Number: CSA E60335-2-13

Standard Name: Household and Similar Electrical Appliances - Safety - Part 2-13: Particular Requirements for Deep Fat Fryers, Frying Pans and Similar Appliances

Standard Edition and Issue Date: 3rd Edition dated February 1, 2013

Date of Revision: January 1, 2020

Date of Previous Revision of Standard: 3rd Edition Reaffirmed 2018

EFFECTIVE DATE OF NEW/REVISED REQUIREMENTS

Effective Date: **January 1, 2022**

IMPACT, OVERVIEW, AND ACTION REQUIRED

Impact Statement: A review of all Listing Reports is necessary to determine which products comply with new/revised requirements and which products will require re-evaluation. **NOTE:** Effective immediately, this revised standard will be exclusively used for evaluation of new products unless the Applicant requests in writing that current requirements be used along with their understanding that their listings will be withdrawn on Effective Date noted above, unless the product is found to comply with new/revised requirements.

Overview of Changes: Addition of tests on handles of deep fat fryers. Specific details of new/revised requirements are found in table below.

If the applicable requirements noted in the table are not described in your report(s), these requirements will need to be confirmed as met and added to your report(s) such as markings, instructions, test results, etc. (as required).

Client Action:

Information – To assist our Engineer with review of your Listing Reports, please submit technical information in response to the new/revised paragraphs noted in the attached or explain why these new/revised requirements do not apply to your product (s).

Current Listings Not Active? – Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.

STANDARD INFORMATION

CLAUSE	VERDICT	COMMENT
		<i>Additions to existing requirements are <u>underlined</u> and deletions are shown lined-out below.</i>
22	Info	Construction <i>New clause added;</i> The test on handles of deep fat fryers is carried out with the appliance at the operating temperature obtained during the test of Clause 11. A vertical force is applied for 30 seconds to the lifting surface of each handle of the appliance. The force applied on each handle is: 22.12 – 1,5 w for an appliance with one handle, – 0,75 w for an appliance with more than one handle where w is the weight of the appliance when filled with oil to the maximum marked level. During the test the handles shall not work loose or become detached from the appliance.
CUSTOMERS PLEASE NOTE: This Table and column “Verdict” can be used in determining how your current or future production is or will be in compliance with new/revised requirements.
