* If at some point in the future, due to changes in industry trends and requirements within jurisdictions, it becomes necessary to update current listing to the new standard, we will provide enough notice to the manufacturer that would allow a smooth transition to the new requirements. This means your current listings may need to be re-evaluated at some time in the future to the current edition of CSA C22.2 No 62368-1 / UL 62368-1 even though at this time there is no indication that this will happen.

Current Listings Not Active? – Please immediately identify any current Listing Reports or products that are no longer active and should be removed from our records. We will do this at no charge as long as Intertek is notified in writing prior to the review of your reports.
