Testing and Inspection service area:

- Northern New Jersey
- New York State, New York Harbor
- Connecticut
- USA and International Clients

Petroleum and Chemical Cargo Inspection:

Intertek has been providing professional petroleum cargo inspection services across the world since 1885. Intertek coordinators, inspectors, samplers and dispatchers are thoroughly trained, and have years of industry experience. The majority of the field staff are IFIA Certified Senior Inspectors. Petroleum and fuel commodities inspected include gasoline, middle distillates, residual fuels, petrochemicals, LPG/LNG, and biofuels. Industry experience includes significant backgrounds in cargo loss control & investigation, terminal operations & management, petroleum blending, and more.

Cargo Additives Treatment and Testing:

Professional and effective cargo treatment services for off-specification petroleum and refined products are available on a 24/7 basis. Intertek, using Baker Hughes additives, provides bulk cargo treatment additive services to the petroleum industry. Cargo treats are ready for crude oils, fuels and other bulk refined cargos which do not meet trade specifications.

Effective and efficient solutions are available to treat cargo specification challenges, including the inspection, testing and treatment of valuable petroleum, chemical and refined product cargos. By resolving cargo specification supply and trading challenges in the shortest time possible, Intertek and Baker Hughes cargo treatment services help minimize costs and maximize profits.
