## New Service Announcement: Expanded Air / Water / Structural Facility – Farmingdale, NY

*In late 2015, Intertek welcomed PSI, Inc. and MT Group to the family, resulting in an expanded scope of service offerings in the building & construction market.*

*On the heels of the addition of ATI in late 2013, once again, we have been able to further extend Intertek's breadth of capabilities allowing us the opportunity to offer a more complete solution to our customers. As the most comprehensive provider of assurance, testing, inspection, and certification solutions in the building & construction industry, we look forward to partnering with you on your next project.*

Intertek is pleased to announce the expansion of one of our newly acquired facilities located in Farmingdale, New York. Previously the headquarters for MT Group, this location operated largely as a materials testing and special construction inspection site; however, since the union late last year, Intertek decided to make a significant investment in this laboratory to better serve our customers. The building was completed in September, with additional outdoor test walls still under construction.

With nearly 3 times the space previously designated to Air, Water, and Structural testing, brand new equipment, and working rooms to ensure the comfort and productivity of our visitors, this location is better equipped to provide the fenestration testing services you need. The expanded facility has the expertise of over 40 years of experience in Air, Water, and Structural testing from our lab in York, PA with the added convenience of location and client friendly focus.

“The growth of our Air, Water, and Structural testing space from 5,000 to approximately 14,000 square feet is going to result in more convenient testing solutions for our customers,” says Frank Pennisi, Director of Fenestration – New York Operations. “In addition to the new insulated glass chamber, indoor test wall, and expanded mock-up wall, the building now houses plenty of space specifically designed for use by our guests. We are excited to continue to provide our professional quality services to our clients in an updated and more comfortable environment.”

**Intertek**

*Intertek's ETL mark is the fastest growing safety certification in North America and is featured on millions of products as proof of product compliance to North American safety standards. Authorities Having Jurisdiction (AHJs) and code officials across the US and Canada accept the ETL Listed Mark as an indication of manufacturers' commitment to safety. Retail buyers accept it on products they're sourcing, and every day, more and more consumers recognize it on products they purchase as a symbol of safety and quality.*
